New ARM-10 DLP 3-D printer \$6,995.00

The ARM-10 desktop 3D printer features a proprietary projector lens and Roland's imageCure™ resin, creating 3D models cured using UV light. The DLP process creates high quality prints and the projection process allows multiple objects to be produced at the same time. Post-processing, such as support removal, finishing, and adding color is simple to do.

Accessories:

PRH35-ST - ImageCure Resin-Clear for the ARM-10 - 129.95

LMV-10 - Resin Tray for ARM-10 - \$119.95
